

contradise

**A platform that allows to report
addresses that help to finance
Terrorist state organizations and
relay that information directly to
the Government Sanctioned
Addresses database**

**All of the efforts are now
being focused on the needs
of Ukraine Military Forces**

The problem

Terrorist Financing is being conducted behind everyone's back on social media channels. This includes equipment acquisition in the form of firearms, reconnaissance devices and other dangerous additions. This needs to be stopped especially with the rise of cryptocurrency donations that detour sanctions.

Solution

Our solution is a platform that enables everyone to submit information on Terrorist Financing, aggregate all of it and relay directly to the government for them to act

Anyone is able to anonymously report via Blockchain an address that is related to Terrorist Financing. This will prohibit this address from laundering the assets and acquiring any equipment

We are using HAPI as AML Provider

**Protected by
HAPI Protocol**

The main objective is to amass as much data as possible to enable then an algorithmic based flagging.
